Asthma Action Plan

Green zone (doing well): no cough or wheeze, peak flow above 80% of personal best (personal best 450 L/min). Take budesonide-formoterol 160/4.5 one inhalation twice daily.

Yellow zone (getting worse): cough, wheeze or night waking, peak flow 50-80% of personal best. Take an extra inhalation of budesonide-formoterol as needed, up to 12 inhalations per day, and call the clinic within 24 hours.

Red zone (medical alert): very short of breath, peak flow below 50% of personal best. Take reliever medicine and call emergency services.
